

Aim of workshop

Science-driven recommendations for ESS Instrument suite

Science-driven recommendations for Scientific
Infrastructure

Complex systems <-> Model systems

Isotope variation

Data handling

Sample environment

Science Center driven by academia

Industrial interactions

Beam time – access, proposal system

Next neutrons and food !

Science & Scientists at ESS BERLIN 19-20 APRIL 2012

At the Science and Scientist meeting in Berlin, you will hear the progress we have made in delivering the ESS as well as the scientific and technical challenges that neutron science faces. The meeting to this end is aimed to be as challenging as it is interesting and stimulating.

More importantly, the meeting aims to facilitate interactions between ESS and the broad scientific community on the scientific program and instrumentation that ESS and its partners will build for Europe.

The meeting aims to be an introduction to a series of workshop to be held every year between 2012 and 2020 that will guide the scientific priorities and instrumentation at ESS.

Your participation, as a user of neutron facilities is important in forging the future of Neutron Science in Europe together.

The meeting will take place at the Deutsche Telekom's Berlin representative office on 19-20 April 2012.

Conference fee is 120 € (students 60 €)
